Paintball

Price from CHF 30.- / person

Description

Paintball involves two opposing teams in different colours with the same mission. Several different strategies are offered in order to complete the mission within the time limit (between 5 and 15 minutes), so that several different scenarios can be played out in one game.

Paintball games are played according to a strategy of movement, attempting to mark players from the opposite team with a gun filled with paint pellets (100% biodegradable). The game is absolutely without danger as long as a few safety rules are respected. Each game is supervised by a facilitator who ensures that the game runs smoothly.

Highlights

> Defining strategies in a group
> Magnificent setting

Programme / itinerary
